r/startrek Rules

1. Read the full rules & guidelines
2. Follow Wheaton's Law
3. Don't be dismissive
4. Respect spoilers
5. Keep it related to Trek

Welcome to /r/startrek!

New to Trek?

[Wondering where you should start?](#)

Subreddit Rules & Guidelines:

[Click here for more detailed explanations of the rules!](#)

Discussion reposts are OK: As our community grows people join who might have missed the first time around.

Encourage discussion: Don't downvote just because you disagree on best captain/episode /phaser type!

Don't be dismissive: Comments like "It's just a show" or "Q did it" stifle discussion.

No spamming/karmawhoring: Direct image links and other kinds of posts will be removed automatically [click for how to post image links](#).

Respect the ensigns: Spoiler tags aren't enforced (except for DSC), but they are encouraged. [Click for a how-to.](#)

I feel like a lot of people are forgetting about the events of Star Trek: Insurrection when they criticize Starfleet's portrayal in Picard E01

This isn't the first time the Federation has opted to play it safe, instead of "doing the right thing". Picard openly defied Starfleet before for almost the exact same reasons that he mentioned during Picard E01 and was completely willing to lose his post over it.

He also defied a Starfleet Admiral who insisted on commanding Data's daughter Lal even though the guy directly threatens his career.

I would have loved to see an ep where the Federation suffers a next-level Prime Directive snub

Could have been on TNG, DS9, Voyager or even Enterprise. We've got our Federation and its Prime Directive and the bar for considering Federation entry being Warp drive. It would have been nice to see an advanced alien species, likely with either better-than-warp tech or something even more 'different' and 'out there', end up having to deal with a trek ship and crew before explaining that the ship and crew were considered too primitive to really assist them. Imagine Janeway being told "We'd love to send you back to Earth in ten seconds using our amazing TransHyperSuperDuperWarp technology but we have this thing, in your language it would translate as a 'Prime Directive', which says we can't help you, can't click our fingers and fix your problem, because, well, basically you're just sorta primitive by our standards, don't take it personally of course". Sometimes I think it's nice to see Starfleet on the receiving end of what it so often dishes out.

Fan Creations Tried my first stop motion of one of my favourite scenes

Spoiler Policy

- Read Our Spoiler Policy
- How To Properly Set Spoilers

Family Friendly Policy

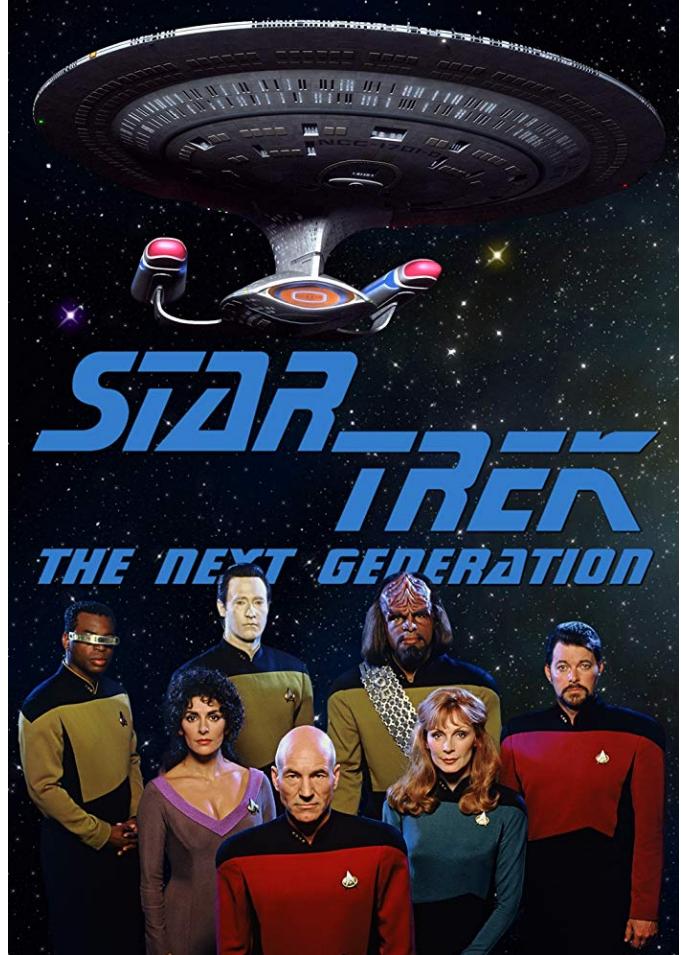

- Abide the Reddiquette
- Respect fellow Redditors
- No vulgarity in titles of posts
- No NSFW content - Post it here
- No sexualization of people or characters
- No political posts
- No religious posts

High Quality Content Only

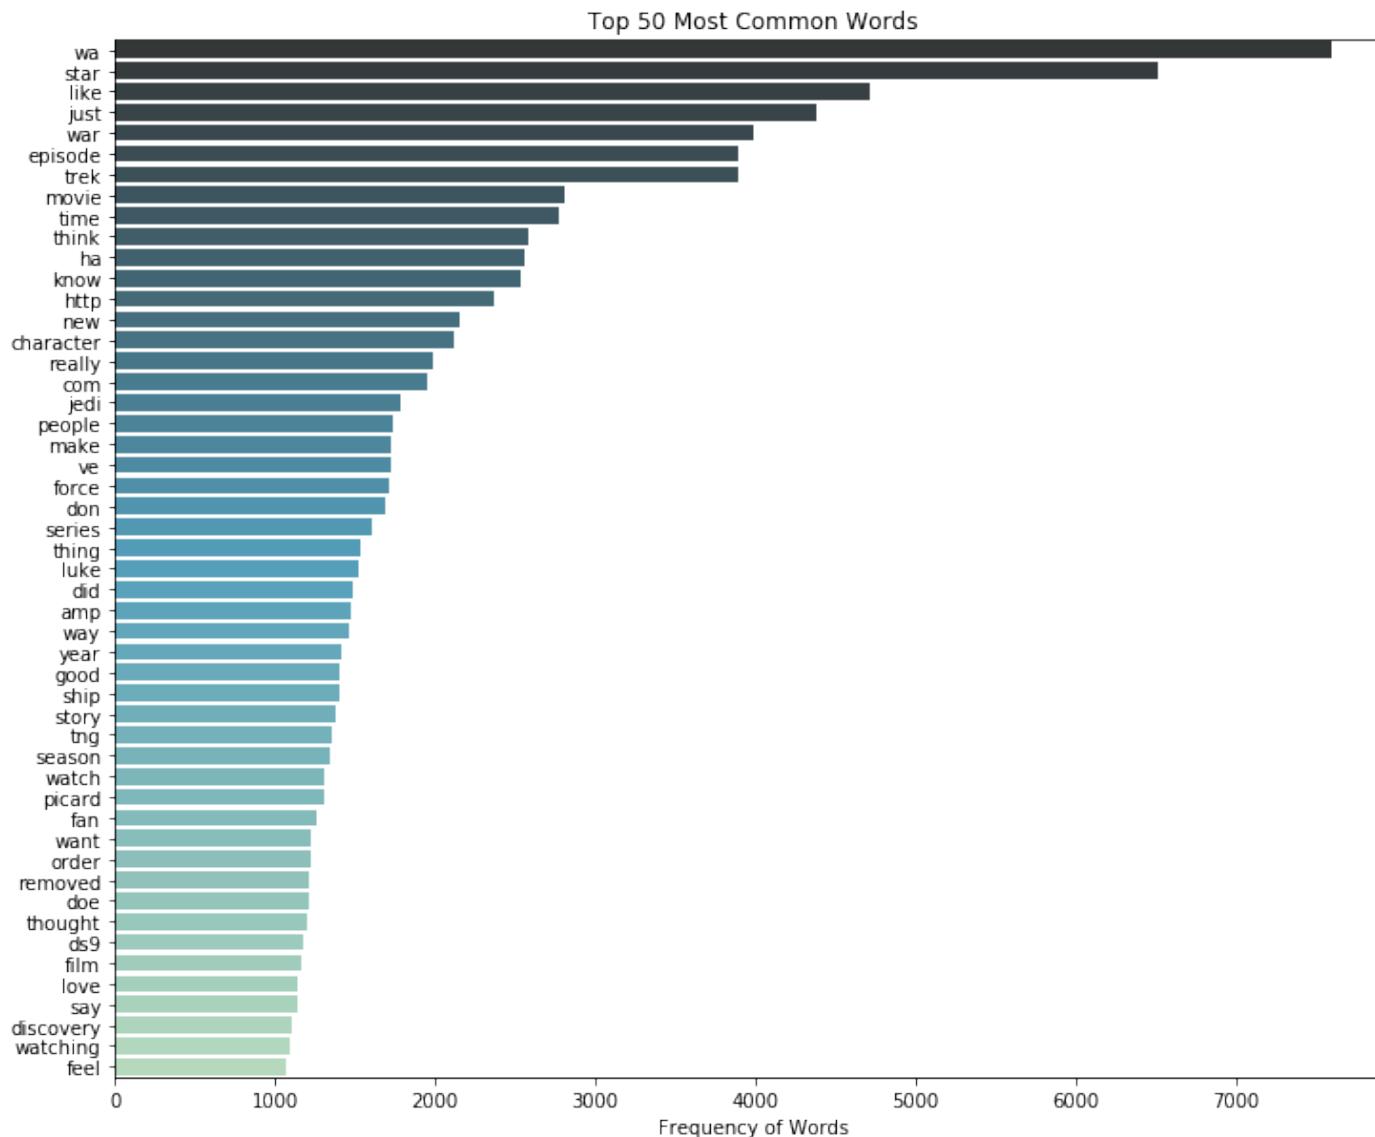

- Discuss the franchise not the fanbase
- Give constructive Criticism
- Link to original news sources, don't editorialize
- No reposts

Using classification models
to predict which subreddit a post belongs to

Problem Statement: r/scifi_universes needs a bot to suggest what other subreddits a post should be cross-posted to.

Pre-processing: Custom Stop Words

Process to determine custom stop words:

Top 50 **most common words** in the dataset:

Two types:

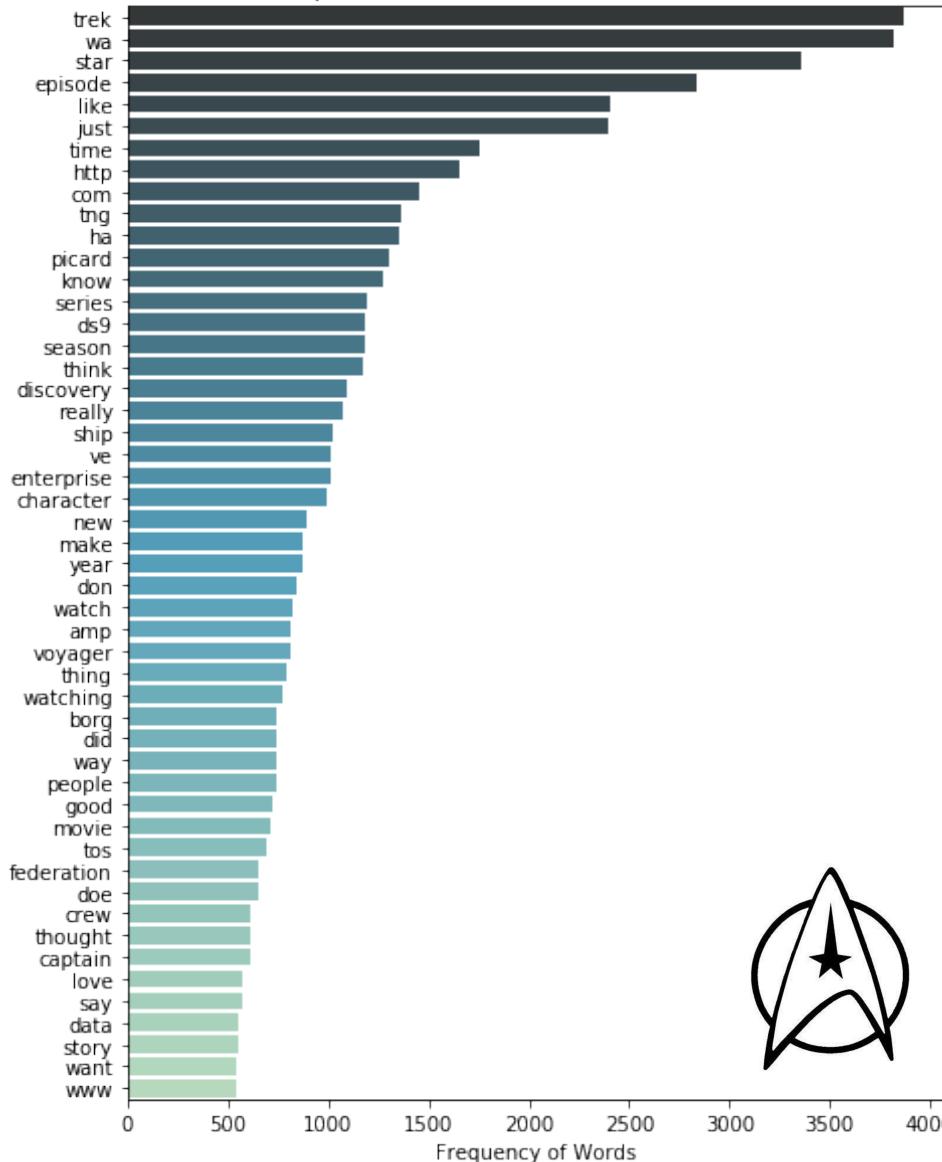

1. Words that are common in both subreddits, such as: like, just, know, new etc.
2. Words that are particular to only one of the subreddits. e.g. jedi, picard etc.

The first type will be appended to the default Stop Words and removed; the second type will stay.

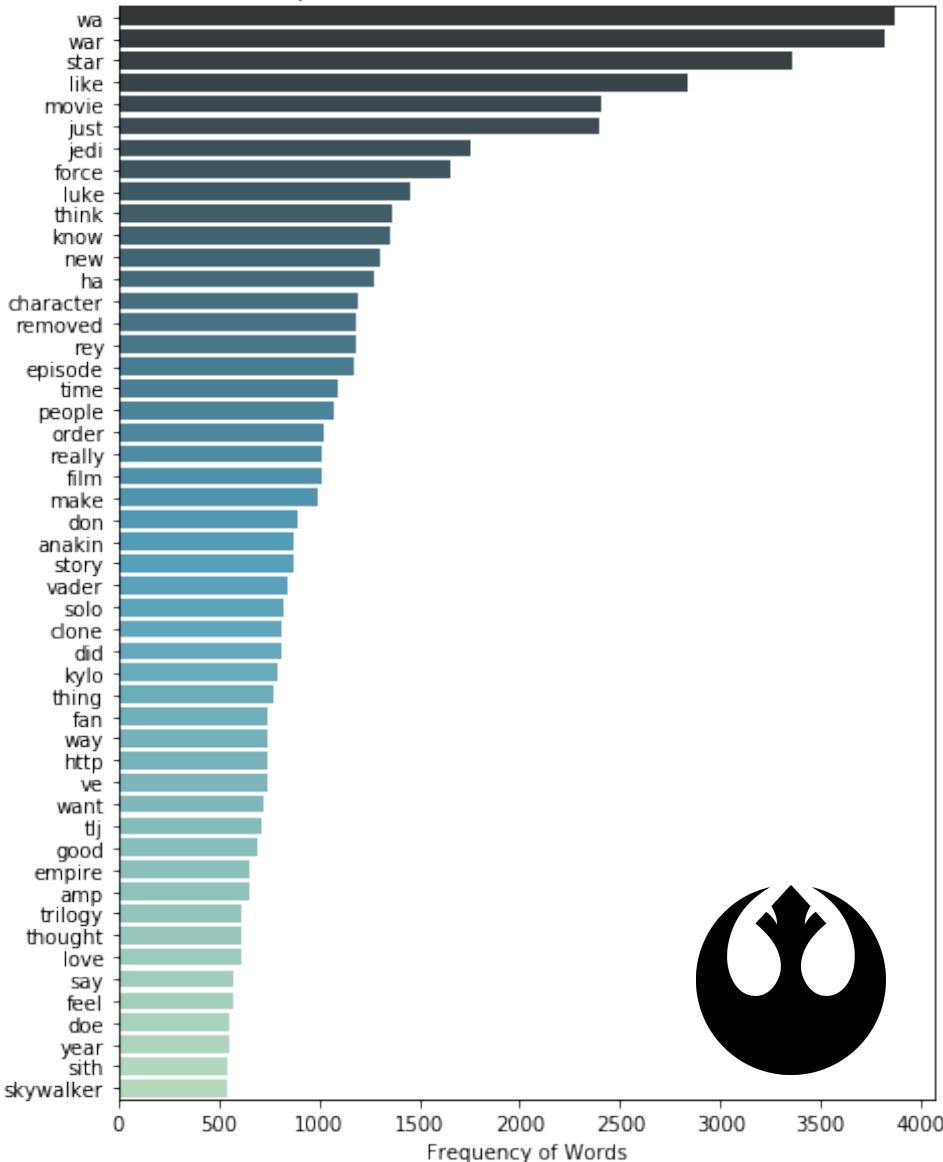

Additionally, “giveaways” words such as “starwars”, “war”, “startrek”, “trek” will be appended to the default Stop Words and removed.

Pre-processing: Custom Stop Words

Top 50 Most Common Words in r/startrek

Top 50 Most Common Words in r/StarWars

Model Selection

Model Name	Multinomial Naive Bayes	Gaussian Naive Bayes	Logistic Regression 1	Logistic Regression 2	KNN	SVM
Transformer	CountVectorizer	TfidfVectorizer, Customized Transformer	CountVectorizer	TfidfVectorizer	CountVectorizer	CountVectorizer
Estimator	MultinomialNB	GaussianNB	Logistic Regression	Logistic Regression	Kneighbors Classifier	SVC
AUC ROC (on Test Data)	0.98327	0.95384	0.98121	0.98119	0.89864	0.97668
Run Time (seconds)	22.85	26.29	51.25	47.16	64.28	416.88

* Baseline Model: AUC ROC = 0.5

Model Evaluation Part I

Prediction Model: Multinomial Naive Bayes

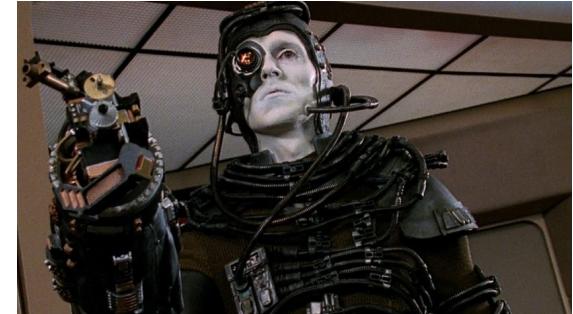

Model Evaluation Part II

Interpretation Model: Logistic Regression + CountVectorizer

"picard"

"borg"

"mandalorian"

"jedi"

Conclusion and Future Steps

- **Multinomial Naive Bayes** is a good model to predict which subreddit posts on r/scifi_universes should crosspost to, i.e. r/startrek or r/StarWars.
- **Limitations** of our model:
 - During the data collection process, information such as which subreddit has more 'is_self' posts was lost.
 - We didn't include comments to train our models.
- Future Steps: go **beyond binary classes**.
 - e.g. add class r/BSG: Battlestar Galactica
